# CONSULTATION

**Please assist us on the day of your consultation by providing us with the following:**

- Referral slip
- List of current medications
- Current insurance and photo ID card(s)
- Any relevant radiographs (X-ray, CT, MRI)

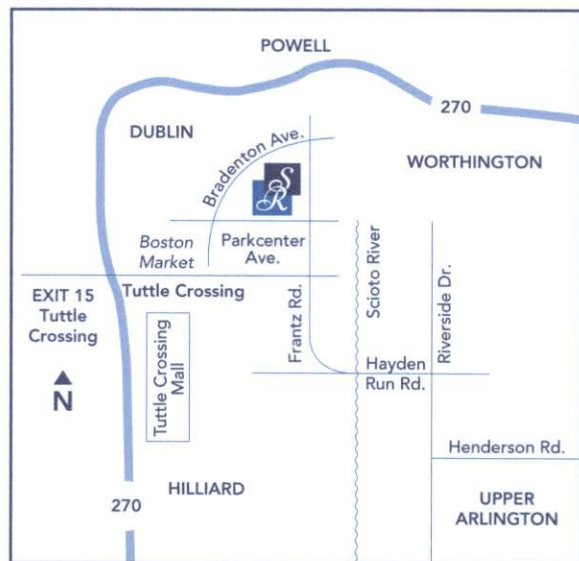

Any patient under the age of 18 is required to be accompanied by a parent or legal guardian.

We strongly believe that surgical success comes from the best preparation. For us, that preparation is initiated with your consultation appointment, an element we find essential for our care as it allows our doctors the opportunity to personally review your medical history and discuss treatment options with you.

A consultation appointment provides us the ability to prepare you for your surgery by reviewing the nature of the procedure. We will also prepare you for both pre-operative and post-operative care and potential risks and complications associated with your surgery. Additionally, we can prescribe any medications necessary to be taken before surgery or for your recovery.

Our standard is to create an environment that is informative and provides you with confidence in our surgical team.
